► Company Profile

Innova Bio-Meditech is one of the leading global providers of laboratory and medical devices. Firmly committed to our mission of “sharing innovative bio-meditech solutions with the world”, we are dedicated to innovation in the fields of Biology Project, Life Science, Pharmacy Industry and Medical Treatment.

Headquartered in Boston, USA, Innova Bio-Meditech possesses a sound distribution and service network with business partners in North and Latin America, Europe, Africa and Asia-Pacific etc.

Innova has built up a well-established R&D, manufacture network with 4 centers in Boston, Beijing, Qingdao, and Shanghai. Inspired by the needs of our customers, we adopt advanced technologies and transform them into accessible innovation. This means constant effort and research, in order to more fully understand and anticipate the developments of the market, produce constantly upgraded product ranges by adding new products year after year.

Secure Quality, Continuous Innovation

Introduction

CryoStock series are economical small and medium size liquid nitrogen containers for long term static state storage. CryoStock series are made of high strength and lightweight aluminum alloy. There is multilayer superior performance thermal insulation inside.

Various accessories are optional. Mainly apply to animal husbandry and laboratories.

Key Features

- | | |
|--|---|
| 1 High strength and lightweight aluminum construction | 5 Lockable lids |
| 2 Ultra-low evaporation losses | 6 Straw storage |
| 3 Numbered index canisters | 7 LN ₂ dispenser (optional) |
| 4 Mobile roller bases optional | 8 5 year vacuum warranty |

Important Accessories

1. 600mm Liquid Level Ruler
2. 1000mm Liquid Level Ruler
3. LN₂ Dispenser

Remark:

1. Model number end without "L" are supplied with 110mm or 120mm length canister. One layer of straws can be loaded.
2. Model number end with "L" are supplied with 260mm or 276mm length canister. Two layers of straws can be loaded.
3. For example, CryoMajor30/50 is supplied with canister height 120mm, while CryoMajor 30/50L is supplied with canister height 276mm.

New Products and Canes

Technical Parameters

(CryoStock 35/125T)

CryoStock series will be also used to store 0.5ML-5ML vials with cane. The storage quantity shown in the table below:

Introduction

CryoTrans series is designed for storage and short-distance transportation of small amount of liquid nitrogen. It is equipped with rubber protection rings and prefixed bottom pad for safety. Stainless steel roller base is optional for convenient transportation. Cryo Trans series is widely used in animal husbandry and laboratories.

Key Features

- 1 Strong, lightweight aluminum construction
- 2 Low liquid nitrogen evaporation
- 3 Special liquid nitrogen transportation design
- 4 CE Certificate
- 5 5-year vacuum warranty

Important Accessories

1. Liquid nitrogen level ruler
2. Roller base.

CryoTrans Series

CryoArk Series

Introduction

CryoArk series is dry shipper containers. It is designed for biology, livestock breeding, research and medical fields and enables the biological samples, straws, cryovials or blood bags to transport below -150 °C environment. There is liquid nitrogen absorbent materials placed in the inner tank, which avoids the risk of outflow of liquid nitrogen. The CryoArk dry shipper meets the IATA and protect your valuable samples in safe conditions for both users and transporters during transportation.

Key Features

- 1 Vapor phase cryogenic storage
- 2 Robust and durable aluminum construction
- 3 Lockable lids
- 4 No spillage of liquid nitrogen
- 5 Available for biological samples straws, cryovials or blood bags
- 6 3 years vacuum warranty

Advantages

- 1** Reliable absorption materials, rapid absorption of liquid N2
- 2** Meet the standard of IATA (The international Transport Association)
- 3** Excellent products construction and superior vacuum performance to ensures the maximum storage time
- 4** Unique stainless steel screen construction ensures samples storage space clean
- 5** All models optional equipped with liquid level monitor

- 1. Handles
- 2. Cap Plug
- 3. Neck Tube
- 4. Canister
- 5. Liquid Nitrogen Absorption Layer
- 6. Vacuum Jacket
- 7. Stage
- 8. Vacuum Sealing Joint

★ Static evaporation rate and static holding time are nominal. Actual rate and holding time will be affected by the condition of container usage, atmospheric conditions, and manufacturing tolerances.

★★ Normal Working Duration is just an arbitrary reference, applying to estimate container performance under normal operating conditions. Actual working time may vary due to atmospheric conditions, container usage history, manufacturing tolerances and individual patterns of usage. Divide static holding days by 1.6, and you get empirical value.

Introduction

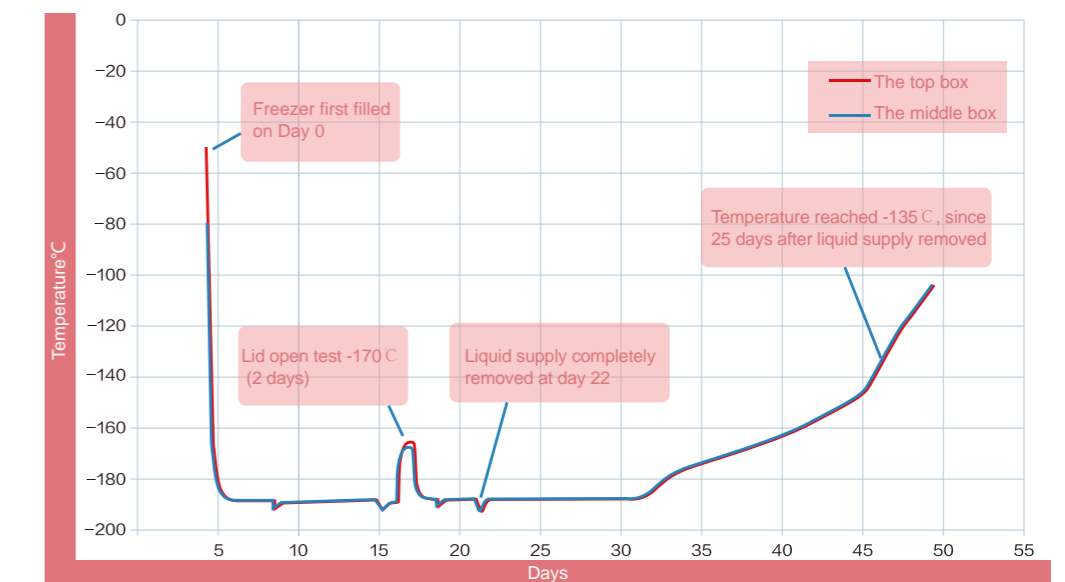

CryoMatrix series breeder tanks provide the user with a fully automatic, safe and reliable cryogenic liquid nitrogen storage system. The sample can be stored either in liquid phase (-196°C) or vapor phase (-180°C). Microcomputer touch control system CryMonitor 3000 provides convenience and security.

Cryomatrix series adopt advanced technology and super vacuum thermal insulation technology to assure the safety of the barrier-free sample storage and good properties uniform temperature and characteristics of the minimum consumption of liquid nitrogen. Even if it is gas storage, the whole storage area temperature difference is less than 10°C.

Key Features

- 1 Dry sample storage
- 2 -190°C at top
- 3 Maximum capacity of liquid nitrogen storage capacity below rotating tray
- 4 One-piece folding stage
- 5 Automatically liquid nitrogen supply
- 6 Storage a variety of blood bags
- 7 De-Fog and liquid nitrogen splash proof
- 8 5 years vacuum warranty
- 9 CE certification
