**CE**

### ASTM D611-A-B-C-D IP 2-A-B-C-D

#### Aniline Point and Mixed Aniline Point of Petroleum Products and Hydrocarbon Solvents

Method A is suitable for transparent samples with an initial boiling point above room temperature and where the aniline point is below the bubble point and above the solidification point of the aniline-sample mixture.

Method B, a thin-film method, is suitable for samples too dark for testing by Method A. Methods C is for samples that may vaporize appreciably at the aniline point.

Method D is for samples that may vaporize appreciably at the aniline point, particularly suitable where only small quantities of sample are available.
